Database Schema

```javascript
const UserSchema = new Schema({
    name: {
        type: String,
        required: true
    },
    location: {
        type: String,
        required: true
    },
    email: {
        type: String,
        required: true
    },
    password: {
        type: String,
        required: true
    },
    data: {
        type: Date,
        default: Date.now
    }
})
```
